LEAVING OUR MARK

Conform a Multidisciplinary and Multicultural Team aligned with Technical and Social Values

Form a team of talented people trained under excellent continuous training and teaching methods, aligned with technical and social values, and capable of interacting with the community where CIDESA GROUP lives.

Aware of the help we have to provide, we have proposed to form work teams integrated by people from both sides to improve the technical and human company-community relations.

Establish communication channels to deal with joint problems and their possible solutions, make mutual commitments to explore the technical skills and knowledge of the people, bring together the strengths of one and the other in search of the same objectives, and lay the foundation to promote sustainable alliances in a harmonious climate.

Our goal is your satisfaction, let's succeed!

Recruitment, Selection and Hiring of Personnel

Business organizations must automate their organizational procedures to face the economic variables and technological challenges of the moment; produce helpful information to identify new business opportunities, solve problems, and make decisions on the spot. To have specialized personnel and modernize customer, public, and supplier service processes to achieve sustainable competitive advantages.

Analyzing the previous paragraph and the opportunity to collaborate with the productive sector, offer to consult services for recruiting, selecting, and hiring personnel composed of competent technicians, organized leaders, motivators, innovators, visionaries, collaborative and productive, aligned with information needs, and customer objectives.

We are specialists in the implementation of software tools specified below:

✓ Full Stack Development (Frontend and Backend)
✓ Database (MongoDB, Oracle, MySQL, POSTGRES).
✓ Programming (Node.js, JavaScript, PHP, Golang, Python, C++, Java).
✓ Interface (API, React.js (Frontend – UI), Restful APIs (Backend), Docker CI/CD).
✓ Framework (Alpine.js, Angular, Django, Eclipse).
✓ Services (AWS, Microservices, Swagger, GIT, GitHUB, GitLab).
✓ Project Management (Agile, SCRUM, JIRA, Trello).
✓ Linux, Apache, Windows, Slack.
✓ Big Data, Data warehousing.
✓ Data modeling, Cloud Infrastructure, SaaS Products, open-source and closed-source software.

APPLY RESUME   **APPLY SERVICE**

Manage Your Business Software Process

The IT systems management and business continuity service is our means to guide and reorient the execution process of the software phases in production. It is the procedure to manage corporate networks, databases, IT infrastructure, system security, and computer center.

Focus our services on identifying the client's information requirements and checking its technological strengths, human and budgetary resources to generate information and distribute it to the right places, the right people, and at the right time.

Hiring the Manage Your Business Software Process Consulting service has the following benefits:

✓ Technological input, multidisciplinary mutual support, and expertise.
✓ Learning, adaptation, credibility, and creativity.
✓ Supervised changes and adjustments.
✓ Improved personal relationships.
✓ Economic, administrative, operational, political, and social improvements.
✓ Recruitment of updated personnel.
✓ Reliable and valid information.
✓ Integration of procedures, follow-up, functions, objectives, and goal fulfilment.
✓ Contribution of expert personnel.
✓ Integral vision of the work and attention to detail.
✓ Motivation to research, develop and implement new knowledge.
✓ Support to estimate costs, time, benefits, goal fulfilment, and software life cycle efforts.

GET IN TOUCH WITH US

Software and Web Designing Services Factory

Offer specialized personnel, highly trained in IT, whose objective is to promote IT services consultancies. To manufacture software projects of excellent acceptance and productivity, with a high technological independence and social value. Integrate Software Engineering procedures of continuous improvement to manage computer systems.

Use the methodology of participation and interaction-action to manage software development and production to integrate the stages of system definition, deployment, assurance, and post-implementation.

The methodology guarantees the active participation of all the clients and the consulting firm's personnel in defining the problem that will solve until the Post-Implementation stage.

In addition, the proposed methodology includes the following stages: agreements and contracting, initiation of the project, formation of the work team, and induction and preparation of the employees.

It also includes the project development and implementation plan, information requirements research, data confirmation, and technical training for personnel and users. Evaluation of the technological infrastructure of the installation, execution of the project start-up functions, changes and adaptations. Accompanying activities for the production start-up, follow-up, preparation of settlement reports, and post-implementation guarantees. Contributions, experience, and competencies of the consulting firm.

✓ Professionals with more than 25 years of experience.
✓ Approach objectives, goals, and social, political, and economic management to help the client.
✓ Programmers, software engineers, and developers with over 4 years of experience.
✓ Guaranteed training and coaching programs.
✓ Cost reduction, optimal response times, better benefits, and system productivity.
✓ System with a solid architecture, agile, efficient, flexible, innovative, scalable, and efficient.
✓ Development of a sustainable and integrable system with the community.
✓ Quality assurance and security.
✓ Integral, collaborative, and quantifiable consultancies.
✓ Decision support in risk situations and creative thinking.
✓ Problem-solving, providing new ideas and solutions.
✓ Ability to understand the processes of a company.
✓ Ability to communicate effectively, honestly, honestly, integra, ethically, and excellently.
✓ Knowledge sharing.
✓ Provision of IT staff.
